

MOBILE APP SECURITY

A Radicati Group Web Event

** Please dial-in by phone to listen to the audio portion of this event. The dial-in number is in your registration confirmation email as well as on the side panel of your screen.

9:30 am, PT May 30, 2013

Speakers & Agenda

Speakers:

- Ojas Rege, VP of Strategy, MobileIron
- Mike Siegel, VP of Products, Mocana

<u>Agenda:</u>

- Overview Presentations from MobileIron and Mocana
- Guest Speaker Discussion moderated by Sara Radicati
- Audience Q & A session

Journey to the Mobile First Enterprise

Mobile Iron

Definition...

Mobile First organizations
embrace mobility as their primary
IT platform in order to transform
their businesses and increase their
competitiveness

In a Mobile First Company...

APPLICATIONS

New apps are developed and delivered to mobile devices first

Core business processes can be performed on any device

CONTENT

Content of all types is easily and securely available on any device

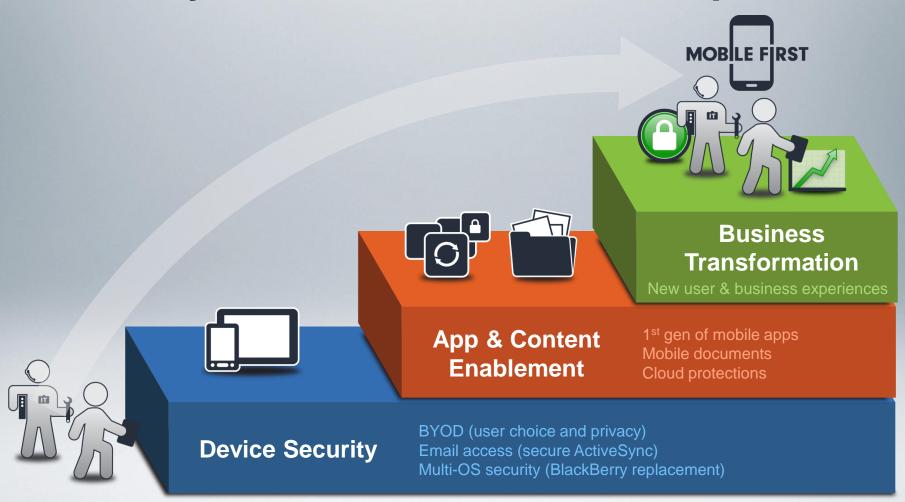

USER EXPERIENCES

End users choose their devices

Security is invisible to end users

User experience is the #1 design criteria

Mocana Mobile App Protection™ (MAP)

Radicati Group - Mobile App Security Panel

May 30, 2013

Mobile is Transformative, yet the Enterprise App Economy is Stalled

of Large Enterprises have <4
Enterprise Mobile Apps, while the avg
of apps on a smartphone is 41

of large enterprises say data security is #1 challenge with developing & managing apps

of app development time is spent on security implementation (up to 6 mos)

Sources: Mocana aggregate data from Customers and Partners; Forrester Research

Unlocking the Enterprise App Economy

BEFORE...

 Enterprise employees have email, calendar & contacts on their devices

WITH MOCANA...

 DOZENS of Enterprise apps mobilizing business processes

Reframing the Mobile User

BEFORE...

Mobile entitled employees (B2E)

WITH MOCANA...

- Anyone with a mobile device
- Extended enterprise of partners, contractors, and affiliates (B2B)
- Customers (B2C)

Partners &

All employees (B2E)

Customers (B2C)

Security Evolves

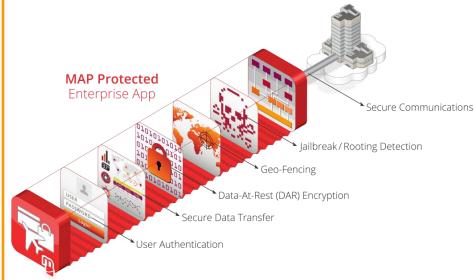

BEFORE...

- Device-centric control based paradigm
- Security fence around the entire device – hard problem exacerbated when you don't own the device

WITH MOCANA...

- Usage enabling data-centric security
- Get BETTER security by narrowing the surface of protection to the company's data, connection to the network and the app that uses both

Manual vs Automated Mobile App Development

BEFORE...

- 30% of development cycle devoted to security implementations
- Adoption of non-standard SDKs
- Even then, implementation of basic, binary security (on/off switches)

WITH MOCANA...

 Automated injection of security and policy controls to the specifications of each customer

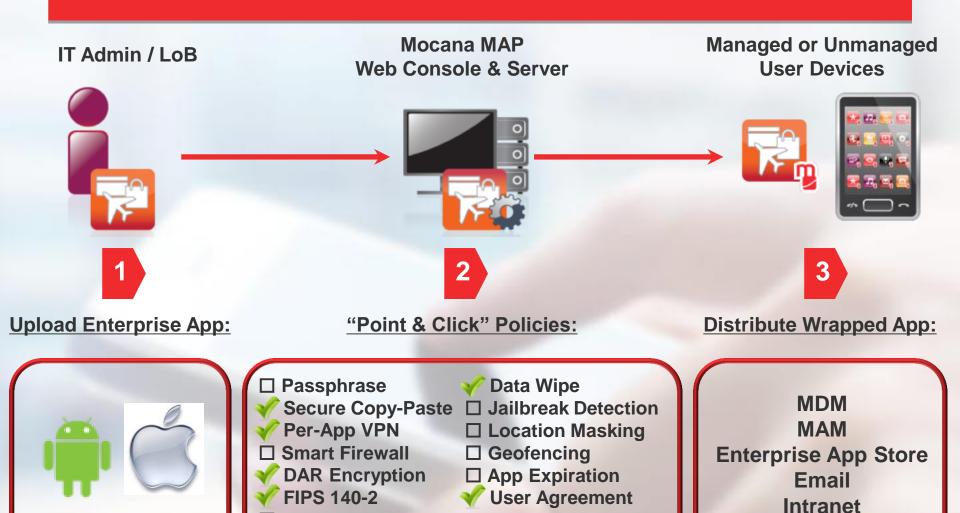

Mocana Rapidly Enables Transaction Assurance

- Mocana provides end-to-end transaction assurance on untrusted mobile devices
 - Enabling Line of Business to quickly deploy mobile apps at scale
 - Device and operating system agnostic without dependencies on fragmented network infrastructure
- We accelerate the creation of secure mobile apps by automating data protection, network access, authentication and policy control
- Mocana approaches the problem in a novel way:
 - No dependency on a device's native capabilities
 - No need to install a client on a device
 - No touch for app developers and IT
 - Maintain the native user experience of the device and the apps

Mobile App Protection™ (MAP)

Zero to Secure in 6 Seconds

□ Lockout Recovery

Mobile App Protection™ (MAP)

Better Mobile App Security from the Security Experts

- App-based security in seconds
- Wraps comprehensive access and data security policies into apps
- Zero coding, SDK integration, or development

- Accelerates deployments by separating app security from app development
- Supports iOS and Android
- Does not require device to be managed

Your Speaker Panel

- Sara Radicati
 President & CEO, The Radicati Group
- Ojas Rege VP of Strategy, MobileIron
- Mike Siegel
 VP of Products, Mocana

Thank You!
